

ADDENDUM TWO

Date: March 14, 2016
To: All Bidders
From: Dan Gartin, Buyer
Department of Health and Human Services
RE: State Response to Written Questions For RFP#83544O3

The period for written questions related to RFP#834544O3 has concluded.

DHHS has received three questions, as follows, related to RFP83544O3, the Health Data Systems Study. Answers are [in blue](#):

Q1: “Would performing the project analysis preclude us from bidding on any analytic opportunities that might come about as a result of this work?”

A1: “The Nebraska Legislature has only directed the study at this time. No guarantee exists that any subsequent actions will be taken that constitute an opportunity for data analytics or other work at this time. If such an opportunity did arise, the successful bidder would not be precluded from participation in future bid opportunities for related work.”

Q2. “Is there a projected budget and / or an estimated level of effort in terms of hours or FTEs for this engagement, and if so, can you specify?”

A2. “The Nebraska Legislature provided \$250,000 for the purposes outlined in the legislative directive, found in LB657 and detailed in the RFP. Bidders must determine their own approach, methods, expected level(s) of effort and FTE engagement needed to properly design, execute, analyze and deliver the study, its recommendations, and any post-delivery legislative support as outlined in the RFP, and those costs should be reflected in their RFP response, in accordance with the instructions in the RFP.”

Q3. “Has there been previous research within the last 2 years performed by the University of Nebraska Medical Center or other organizations within the scope of service of this RFP? If so, how will that research impact the scope of service requested in the RFP?”

A3. “It is unknown to DHHS if the University of Nebraska Medical Center or other organizations have conducted research within the scope of this RFP within the past two years. The Buyer in this RFP is unaware of, and does not believe DHHS is in receipt of, any research, conclusions or recommendations from the University of Nebraska Medical center or other organizations as relates to the request(s) in this RFP. There are no impacts of any previous research to the scope of service requested in this RFP.”
